**WELLCOME  
GENOME  
CAMPUS**

**ADVANCED  
COURSES AND  
SCIENTIFIC  
CONFERENCES**

# Operating System (OS)

- Software that supports the computer's basic functions
  - Manages computer hardware (screen, mouse, keyboard)
  - Provides tools for managing files, running software
  - Provides a way via software applications to interact with the computer
- Examples:
  - Windows
  - OS X
  - Unix
  - Linux

# Virtual Machine (VM)

- VM is a computer environment that can be run on any computer
  - OS, data, software application
- Allows you to run one OS (Linux) on another OS (Windows)
- Created a VM for this course
  - Linux OS
  - Data for practicals
  - Bioinformatics software (bwa, samtools, vcftools, igv, etc.)
- Take it home and use on your own machine
  - Take the course again!
  - Run bioinformatics analysis

# Getting Started
